

New Payen® Oil Seals Catalogue Provides Enhanced Global Coverage
New catalogue features 120 new products; site is easy to navigate and now available in 8 languages

Kontich, Belgium, March 29th, 2018. Federal-Mogul Motorparts today announced a new catalogue that covers the expanded Payen® oil seals range, featuring 120 new products and covering light vehicles, light commercial vehicles and commercial vehicles. Available in eight languages, CAPTA1801 provides market-leading part coverage with 13.300 engine links for valve stem seals; 7.700 for camshaft seals; and 15.900 for crankshaft seals.

“The new Payen oil seals catalogue demonstrates the brand’s expanding portfolio for a diverse range of vehicles from light to commercial,” said Alexis Goslin, Business Director, Sealing, Engine and Underhood Service, Federal-Mogul Motorparts EMEA. “We have designed the layout to be more intuitive, providing flexibility and simplifying part look-up, as we want to provide more options than just the popular products that are used globally.”

Navigation can now be carried out by vehicle or engine search, while easy to use oil seals charts are displayed by dimension or reference. The new catalogue also includes miscellaneous seals such as washers, o-rings and oil seal sets – providing everything required in one place to streamline the part-ordering process for customers and reduce the chance of incorrect orders. The new catalogue also offers a full overview of the Pro-fit range, the Payen service products that help engine rebuilders in their daily work.

As is customary for all Federal-Mogul Motorparts brands, Payen offers additional customer support through the creation of installation videos and leaflets. “Correct part supply is one step; we also aim to ease installation and improve accuracy through the provision of simple instructions and handy tips,” concluded Goslin.
